## Muttart

- » The Muttart service road (98 Avenue) is closed permanently. Drainage and retention work will begin this year.
- » The stop construction will also begin this year.

## Connors Road

- » Connors Road will undergo lane closures this Spring in order for EPCOR to do drainage work in the lanes.
- » Temporary lanes will be built on the north side of the hill and traffic will be shifted over.
- » For the duration of the construction the lane control lights will be removed and the current three lanes will change to two inbound lanes to downtown and one outbound lane.
- » This year, people will see the new permanent road being built and the new retaining wall being installed on Connors Hill.

## 95 Avenue

- » Starting about mid-April, traffic on 95 Avenue will be shifted to the north side of the road in order to start construction on the south side.
- » All parking on both sides of 95 Avenue will be closed so crews can begin widening the road for the new LRT.

## 85 Street North of the Traffic Circle

- » Traffic on 85 Street north of the traffic circle will be shifted throughout the year from the east side to the west side as work continues in the area.

## Bonnie Doon Traffic Circle

Construction on the new intersection will begin this year. When complete, this will be a big change for motorists, cyclists and pedestrians in the area.

These are the moves traffic will be able to make from the intersection:

Motorists on 85 Street northbound, south of the intersection, can turn right onto 90 Avenue or can turn right onto 83 Street.

Motorists on Connors Road eastbound can turn left onto 85 Street north of the intersection or turn right onto 83 Street or can continue straight onto 90 Avenue.

Motorists on 83 Street northbound can go left onto Connors Road or can continue straight onto 85 Street north of the intersection. There is no right turn onto 90 Avenue from 83 Street.

Motorists on 90 Avenue westbound can turn right onto 85 Street north of the intersection, continue straight onto Connors Road or turn left onto 83 Street.

Finally, motorists on 85 Street southbound, north of the intersection, can go right onto Connors Road or can continue south onto 83 Street. They can also go left onto 90 Avenue.

- » Construction will begin this year inside the current traffic circle to turn it into an intersection.
- » The new intersection will open in 2019.
- » Work will start in the middle of 90th Avenue around mid-summer and people will see the intersection begin to take shape. Traffic will be split to north/south temporary lanes.

## 83 Street

- » This spring, TransEd crews will begin excavating for the Bonnie Doon Stop.
- » The traffic on 83 Street may shift from east to west throughout construction so that crews can work on both sides of the road.
- » In Spring, 83 Street between 82 Avenue and the traffic circle will be reduced to one lane northbound for about three weeks to allow drainage work to be completed.
- » Parking garage access south of 84 Avenue will be maintained from either the north or south direction.
- » Permanent road and sidewalk construction will take place this year.
